GLUEFAST IMPROVES LABEL PRO 5.5E!

World's smallest motorized label gluer!

The Gluefast Company has improved our smallest label gluer by replacing a mechanical label detection device with a photo electric sensor. This small photo eye is placed under the cover of the gluer. When a label is fed into the gluer the photo eye senses the label, sending a signal to a small pc board which then turns on the motor to power the gluer.

Unlike larger gluers this motorized gluer only turns on the motor when the label is detected. Half-a-second after the label passes the photo eye the

motor shuts off. This helps improve the pot life of the glue, adding to the simplicity of this reliable gluer.

Used by many small wineries, craft brewers, and food producers, the Label Pro 5.5E motorized gluer applies glue to paper labels up to 5.5" wide, any length. A non-motorized unit is also available for smaller companies. Gluefast also offers a great water-resistant adhesive for use in the Label Pro 5.5 for labeling.

The Gluefast Company has manufactured gluing equipment and adhesives for the packaging, converting and graphics industries for 80 years!

You can visit our website at www.gluefast.com.
